News

On 8 November 2021, the Court launched the [Bulgarian interface](#) of its case-law database HUDOC, developed in cooperation with Bulgarian authorities. With more than 820 texts in Bulgarian uploaded from various partners, the interface shall further increase the understanding of the Court's case law among legal professionals and the general public. It joins the existing English, French, Georgian, Russian, Spanish, Turkish, and Ukrainian versions of the HUDOC database, which already contains over 33,000 case-law translations in 31 languages other than English and French.
